## TECHNICAL DATA

**UPPER:** recycled textile hydro

**INSOLE:** Effusio®

**TOE CAP:** 200 J non-metallic Unicomp®

**MID-PLATE:** non metallic '0 anti-perforation textile'

**SOLE:** polyurethane double density

**LINING:** breathable with high steaming permeability

**SIZES:** 35/48

USE

*SRC polyurethane double density*

Toe Cap  
**UNICOMP®**

## Insole **EFFUSIO®**

Reduction of smells.  
High resistant to abrasion covering, breathable, ergonomic design for the maximum comfort.  
Insole made by polyurethane and polyester covering.

The polyurethane gives to the shoe high comfort, shock absorber and high resistance.  
The insole is antibacterial, washable at 30 °C.

This PU INSOLE (antibacterial and breathable) with high shocking absorbing property, give a maximum joint protection to the ankle, knees and lower back.

**Have been noticed performance of breathability comfort and lightness, never reached before.**

## ECO-SUSTAINABLE TECHNICAL YARNS

to respect the environment

Eco safety is a line of eco-sustainable and highly technical products, composed of yarns made using entirely recycled raw materials (pet made from post-consumption plastic bottles).

For the realization of the eco-safety line we collaborated to finalizing a 100% recycled yarn, obtained through a mechanical and non-chemical process that further reduces the exploitation of natural resources and environmental impact, while maintaining the technical and qualitative characteristics of a yarn produced from new raw material.

100%  
MADE IN  
ITALY

## 01

### COLLECTION

Plastic bottles are recovered from recycling.

## 02

### TRANSFORMATION

Cleaning, cutting, granulation (by mechanical process to obtain the polymer), spinning.

**THE WHOLE PROCESS IS CERTIFIED BY THE GRS**  
(GLOBAL RECYCLE STANDARD)

# LESS

POLLUTION

ENERGY

Thanks to the technological know-how and to the experience accumulated over the years, manifattura primatex made high quality technical fabrics with high performance made of 100% recycled fiber yarns. Yarns with zero environmental impact with the same high performance requirements of all items of the multiprotective line.
